

# Chain Drive Augers

High torque provided by EDGE Augers.

Choosing the right auger attachment requires experience, but the team at CEA can help you determine the correct auger drive for your machine and application. Factors to consider are: soil condition, hole width and depth, and hydraulic power of your machine. With a full auger line available from CEA, we are sure to provide you the correct mounting plate, hydraulic-powered auger drive unit, auger drilling bit, and specialized wear parts for your job.

The chain reduction drive units are designed for medium to heavy-duty applications, and are a very popular alternative to the planetary drive augers. Auger drives feature pre-stressed, fully adjustable reduction drives and the strongest connecting links available. Complete units include the universal skid steer mount, hoses, and flat-faced couplers. All bits sold separately.

- ⊙ **CAPABLE OF DIGGING HOLES UP TO 36" IN DIAMETER**
